DETAILED ACTION

1. Claims 9-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As to claim 5, are the "a heating means" (line 32) and "a sample parts holding member" (line 4 from last) the same as that on lines 27 and 21-22? Contrast with the same claim's reference to "the external force detection means" (last line) which makes it clear that it is the same as the "an external force detection means" (of line 22).

As to claim 13, are the "a heating means" (line 32) and "a sample parts holding member" the same as that on lines 26 and 20-21? Contrast with the same claim's reference to "the external force detection means" (last line) which makes it clear that it is the same as the "an external force detection means" (of line 22).

2. As to claims 1 and 9, note was made of the combination of the "flux wetting *preventive layer*" (italics added) with remaining limitations. As to claims 5 and 13, note was made of the "material having a *poor wetting balance*" (italics added) with remaining claim limitations. Weight was given to the particular problem solved by Applicant, and the associated benefit attributed to the above quoted limitations.
